## PROFESSIONAL SUMMARY

Full-Stack Developer (MERN Stack) with 1+ year of end-to-end software development experience in SaaS product development, REST API design, and CI/CD deployment. Sole founder and developer of CommentPulse — a live AI-powered SaaS product built with React.js, Flask, Python, and MongoDB. Proficient in WordPress and Elementor for production CMS deployments. Seeking remote-first or high-growth roles where full-stack versatility, product ownership, and fast iteration drive impact.

## WORK EXPERIENCE

**Software Engineer** | Vishwas Integrated Marine Group *Oct 2025 – Present*

- Redesigned and deployed the company website's Certifications and About-Us pages using WordPress and Elementor, improving content clarity and reducing manual update time by 50%.
- Engineered Python/Tkinter GUI tools adopted across 3 departments, reducing manual data entry time by ~30%.
- Built interactive engineering dashboards with Matplotlib, replacing static reports and cutting review cycles by 2 days.

**Project Trainee** | Einfochips Private Limited *Jan 2025 – Jun 2025*

- Delivered 4+ client web projects using PHP and WordPress in a full production environment within Agile sprints.
- Reduced front-end bug backlog by 40% by introducing JavaScript-driven interactivity across 3 client sites.
- Shipped features on-time across 2 consecutive sprints through daily standups and structured code reviews.

## PROJECTS

**CommentPulse** | Flask · Python · React.js · MongoDB · Vercel | Live

- Sole founder — designed, built, and shipped a full AI-powered SaaS product from zero to live in under 6 months.
- Engineered sentiment analysis, issue detection, Channel Health Score, and content gap identification across thousands of YouTube comments.
- Architected PDF report generation, AI chat on live comment data, and a subscription-ready dashboard.

**UserHub** | Next.js 15 · TypeScript · MongoDB · JWT · Nodemailer | Live

- Built a production-ready auth system with 7 REST API endpoints: registration, JWT login, email verification, and password reset secured with bcryptjs.
- Integrated Nodemailer + Mailtrap SMTP for transactional email delivery with token expiry — zero auth failures in testing.

**Tide Information App** | React.js · Vite · REST API | Live

- Launched a real-time tide prediction app with World Tides API; implemented Local Storage caching that cut repeat API calls by 60%.

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js 15, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Responsive Design
**Backend:** Node.js, Express.js, Flask, Python, REST API Design & Integration, JWT, bcryptjs, Nodemailer
**Database:** MongoDB, MongoDB Atlas, MySQL, Mongoose ODM
**CMS & UI:** WordPress, Elementor (page builder), PHP
**DevOps & Tools:** Git, GitHub, CI/CD, Vercel, Render, Postman, VS Code, Agile/Scrum
**Data & AI:** Pandas, NumPy, Matplotlib, Tkinter, SaaS Product Development, Generative AI

## EDUCATION

**B.Tech, Computer Engineering** *2021 – 2025*
Aditya Silver Oak Institute of Technology, Ahmedabad CGPA: 8.22/10

## CERTIFICATIONS

**JavaScript ES6+** — Udemy (Apr 2025) · **Generative AI Fundamentals** — Oracle (Jul 2024) · **Full Stack MERN** — Pursuing
